DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1,2,4,6-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 350453 in view of Leuschner et al and English et al (4446158)

Ep teaches a basin heater but does not teach the heater along the heating tube not coil around it nor does Ep teach use of a heating volume of less than 14 ounces. Note that the reference, "for use with a wash basin on an aircraft", in the apparatus claims, merely comprises intended use. The patent to Leuschner et al is applied for teaching

Art Unit: 3742

that a flow thru heater can comprise a heating element 4 along the longitudinal extent of the fluid tube and use of the same leads to effective heating of the fluid. In view of this teaching it would have been obvious to modify the EP system to use a longitudinally extending heating element in contact with a flow through tube, to more effectively heat the fluid in the tube 3. Claims 1 and 14 set forth that the heated volume is less than 14 ounces. While one of ordinary skill in the art find such choice well within the level of skill in the art, the patent to English et al has been applied for clearly teaching use of flow thru heaters to heat only a single cup at a time, whatever is loaded into the heater tube reservoir, and in view of this teaching it would have been obvious to modify EP further to limit the heating volume to 14 ounce if desired, such choice designated by undisclosed parameters such as the usage of the heated fluid and structural or size limitations of the device. Note that criticality of the volume is absent since the claimed language does not specify the flow rate or the flow of water at all. Note that the volume heated is a parameter dependent on flow rate and flow pressure, yet undisclosed parameters in the claimed invention.

Response to Arguments

Applicant's arguments with respect to claims 1,2,4,6-25 have been considered but are most in view of the new ground(s) of rejection.

Note that English et al clearly evidences heating of small volumes of water, as set forth in the instant claims.

Art Unit: 3742

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark H. Paschall whose telephone number is 571 272-4784. The examiner can normally be reached on 7am - 3pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on 571-272-4777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
